

MADHANADEVA D

madhanadeva2683@gmail.com | +91 9025703517 | Chennai, Tamil Nadu
GitHub | LinkedIn | Portfolio

Summary

Graduate with expertise in Machine Learning, Data Analytics, and Generative AI. Proficient in Python, SQL, LLMs, RAG, and visualization tools like Power BI and Tableau. Skilled in building interactive reports, dashboards, and AI-driven solutions to support data-driven decision-making.

Education

B.Tech in Artificial Intelligence & Data Science 2021 – 2025
Dr. Mahalingam College of Engineering and Technology, Tamil Nadu CGPA: 8.19

Technical Skills

- **Programming:** Python, SQL
- **AI & ML:** NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch, LLM, RAG, LangChain, Prompt Engineering
- **Backend & Databases:** FastAPI, MySQL, MongoDB, Vector Databases
- **Tools & Platforms:** Docker, Microsoft Azure, Git, GitHub, Streamlit, VS Code, Jupyter Notebook
- **Data Analysis:** Power BI, Tableau, DAX, Power Query, Data Modeling, Dashboard Development

Experience

Data Science Intern – Besant Technology, Chennai Oct 2025 – Mar 2026

- Analyzed and visualized datasets using Python, SQL, Excel, Power BI, and Tableau on datasets with 10K+ records to derive meaningful insights.
- Applied fundamental Machine Learning and Data Science techniques for data preprocessing, exploratory analysis, and building simple predictive models up to 90% accuracy.
- Designed and developed interactive Power BI dashboards using Power Query and DAX, creating KPI reports to track business performance effectively.

Intern – Open Weaver (Remote) Jun 2023 – Jul 2023

- Customized, configured, and deployed 3 web applications using pre-built libraries from the Kandi platform to meet project requirements.
- Adapted and optimized 5+ Machine Learning and Deep Learning codebases from repositories to enhance understanding and improve performance.
- Assisted in frontend optimization and collaborated effectively with a team of 3 members to deliver projects within deadlines.

Projects

Multimodal Text Extraction and Contextual QA System GitHub

Python, LLMs, RAG, Milvus, LangChain, FastAPI, Streamlit

- Built a Retrieval-Augmented Generation (RAG) system to extract and query text from 100+ PDFs, images, and URLs.
- Implemented text extraction using Tesseract OCR, pdfplumber, and BeautifulSoup; processed and stored embeddings in Milvus for efficient retrieval.
- Integrated a Large Language Model using LangChain to generate context-aware responses for user queries.

Ask DeX – Advanced AI Assistant GitHub

Python, Streamlit, OpenRouter API, Vision-Language Model (Qwen3-VL-235B)

- Built a AI assistant to process and analyze text and image inputs in real time using the Qwen3-VL-235B vision-language model.
- Implemented image processing and OCR capabilities; handled input formatting and API integration for efficient response generation.
- Enabled OCR, image understanding, and code debugging from screenshots using a vision-language model.

Certifications

- Data Science Course – Besant Technology
- Introduction to Generative AI – AWS Educate
- Machine Learning Foundations – AWS Academy
- Machine Learning with Python - Coursera
- Exploratory Data Analysis for ML – Coursera
